Main Ideas/Questions	Notes/Examples
What is a RATIO?	<ul style="list-style-type: none"> A _____ Ways to represent a ratio: _____ Ratios can be _____ <p>Example: A music store has 40 trombones in stock. Write a ratio of</p> <ol style="list-style-type: none"> trumpets to violins _____ trombones to trumpets _____ A _____ Extended ratios are written _____

Name: _____ Date: _____
Topic: _____ Class: _____

Main Ideas/Questions	Notes/Examples
SIMILAR POLYGONS	<ul style="list-style-type: none"> Polygons with the same _____ but _____ Polygons are similar if: <ol style="list-style-type: none"> _____ _____ The ratio of corresponding sides is called _____ If _____

more practice with **SIMILAR FIGURES**

USE THE SIMILARITY RELATIONSHIP TO FIND THE INDICATED VALUE.

- $\triangle QRS \sim \triangle TUV$; find x
- $\triangle ABC \sim \triangle ADE$; find x
- $\triangle MNP \sim \triangle QRP$; find PR
- $\triangle BCD \sim \triangle FGE$; find FE

Name: _____ Date: _____
Topic: _____ Class: _____

Main Ideas/Questions	Notes/Examples
AA~ (Angle-Angle Similarity)	<p>Directions: Determine whether the triangles are similar by Angle-Angle Similarity. If yes, write a similarity statement.</p> <ol style="list-style-type: none">

EXTENDED RATIO

ARE WE SIMILAR?

Directions: Determine whether the triangles are similar. If similar, state the similarity relationship, and write a similarity statement.

Triangle Similarity

<p>AA~ Angle-Angle Similarity</p> <p>If two corresponding angles are congruent, then the triangles are similar.</p> <p>Determine if the examples below are similar by AA~. If yes, write a similarity statement.</p>	<p>SSS~ Side-Side-Side Similarity</p> <p>If all corresponding sides are proportional, then the triangles are similar.</p> <p>Determine if the examples below are similar by SSS~. If yes, write a similarity statement.</p>	<p>SAS~ Side-Angle-Side Similarity</p> <p>If two corresponding sides are proportional and the included angles are congruent, then the triangles are similar.</p> <p>Determine if the examples below are similar by SAS~. If yes, write a similarity statement.</p>
---	--	---

SIMILAR TRIANGLE Proofs

- Given: $\overline{MN} \parallel \overline{JL}$
Prove: $\triangle KML \sim \triangle KJN$
- Given: $\angle EAB$ and $\angle DCB$ are right angles
Prove: $\triangle EAB \sim \triangle DCB$

Name: _____ Date: _____
Topic: _____ Class: _____

Main Ideas/Questions	Notes/Examples
TRIANGLE PROPORTIONALITY Theorem	<p>Triangle Proportionality Theorem: If a line is parallel to one side of a triangle and intersects the other two sides, it divides the two sides into segments of proportional lengths.</p> <p>Converse of the Triangle Proportionality Theorem: If a line divides two sides of a triangle into segments of proportional lengths, then the line is parallel to the third side.</p>

Main Ideas/Questions	Notes/Examples
parts of SIMILAR TRIANGLES	<p>If two triangles are similar, then the following are also proportional to the corresponding sides:</p> <ul style="list-style-type: none"> Altitudes Angle Bisectors Medians

EXAMPLES

Directions: Given the similar triangles, solve for x .

- $\triangle STU \sim \triangle DEC$
- $\triangle GHI \sim \triangle JKL$
- $\triangle ABC \sim \triangle EGF$
- $\triangle PQR \sim \triangle STU$

Unit 6 Test Study Guide (Similar Triangles)

Topic 1: Ratio & Proportion

- The ratio of the measures of the angles in a triangle is 8:3:4. Find the measures of the angles.
- The ratio of the measures of the sides of a triangle is 9:12:5. If the perimeter of the triangle is 130 feet, find the measures of the sides.

Topic 2: Similar Figures

- Find the scale factor of Figure A to Figure B.
- Find the scale factor of Figure B to Figure A.

- If $\triangle KLI \sim \triangle JWU$, find the value of x .
- If $\triangle NML \sim \triangle SRL$, find the value of x .

Unit 6 Test Similar Triangles

- The ratio of the sides of a triangle is 2:6:7. If the perimeter of the triangle is 195 meters, what is the length of the longest side?
- The ratio of the angles in a triangle is 3:10:7. What is the measure of the smallest angle?
- What is the scale factor of Figure B to Figure A?
- If the scale factor of Figure A to Figure B is 3:8, find the value of x .
- If $\triangle GHI \sim \triangle LMK$, with a scale factor of 5:6, find the perimeter of $\triangle GHI$.
- If $\triangle CDE \sim \triangle FGE$, find the value of x .
- If $\triangle HBN \sim \triangle LYR$, find the value of x .
