
QUADRILATERAL *Properties*

TRUE OR FALSE? ACTIVITY

Created by: ALL THINGS ALGEBRA

Quadrilateral Properties

Red Card/Green Card Activity!

Objective: To review the properties of quadrilaterals including parallelograms, rhombi, rectangles, squares, trapezoids, and isosceles trapezoids. This activity was designed for a high school level geometry class.

Activity Directions:

1) Distribute a red card and green card to each student. My cards are about 4x6 cards that I cut from construction paper and laminated so I can reuse them frequently throughout the year.

2) Run the PowerPoint.

3) The first slide gives directions. Click next to get to question #1. Students read the statement and determine if its true or false. If true they hold up their green card, if false they hold up their red card.

4) Students may check their answer by clicking the green check or red X. If it's correct, it will applause. If incorrect, a buzzer will sound.

5) Click next to go to the next question. There are 24 questions total. Answer key is included.
