

SOLVING QUADRATICS

by all methods

Created by: ALL THINGS ALGEBRA®

Quadratic Equations
Cut-Out Puzzles!

Directions: Students solve the quadratic equations around the edges of the individual squares. Then, they cut out their pieces and rearrange them so that their edges match. They paste them onto a template. Four puzzles (factoring, square roots, completing the square, and quadratic formula), a template to paste, and all answer keys are included. The "letters" make the grading very simple. I have my students show all their work on a separate sheet of paper and staple to their puzzle.
